Feedback: Over all I dont have an issue with Development Contributions but what I do find unfair is the contribution that our clients can receive if they have already used there exempt develepmnt allowance of 40sqm and then decide convert and existing garage or construct a dormer window for there existing attic I feel it is unfair to be charged for space that already exists. Essentially they are be levied for the volume the area is creating.

The cost of everything from a building perspective is already extremly expensive .
Thank you
